Activation examples by provisional parent class

Four positive-activation directional views per class; feature IDs refer to the SAE dictionary.

01 Unresolved or low evidence

1,264 dimensions / 2 subclasses

02 Buildings and components

542 dimensions / 16 subclasses

03 Ground, unspecified

526 dimensions / 8 subclasses

04 Trees and components

300 dimensions / 1 subclasses

05 Road and carriageway

239 dimensions / 1 subclasses

06 Sky and clouds

207 dimensions / 3 subclasses

07 Vegetation, unspecified

172 dimensions / 3 subclasses

08 Vehicles and components

143 dimensions / 9 subclasses

09 Material, object unclear

118 dimensions / 42 subclasses

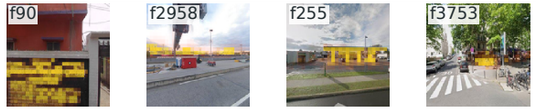

10 Low vegetation

93 dimensions / 7 subclasses

11 Scene context

84 dimensions / 34 subclasses

12 Signs and traffic control

61 dimensions / 7 subclasses

13 Barriers and enclosures

57 dimensions / 9 subclasses

14 Transport structures

54 dimensions / 8 subclasses

15 Utility infrastructure

50 dimensions / 8 subclasses

16 People and body parts

46 dimensions / 1 subclasses

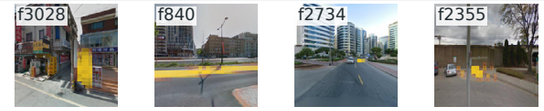

17 Natural terrain

30 dimensions / 4 subclasses

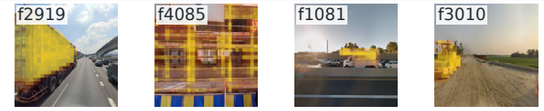

18 Pedestrian space

28 dimensions / 4 subclasses

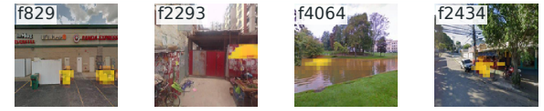

19 Construction equipment

25 dimensions / 11 subclasses

20 Street furniture

22 dimensions / 10 subclasses

21 Water

18 dimensions / 1 subclasses

22 Spatial encoding candidates

17 dimensions / 1 subclasses

Yellow overlays show normalized patch-level SAE responses, not object masks. The four unresolved examples come from weak positive responses.
