Dhaka | ten most prevalent landscape combinations

9,587 observed 1 × 1 km cells · 93,400 sampled four-view panoramas · same spatial extent in every panel

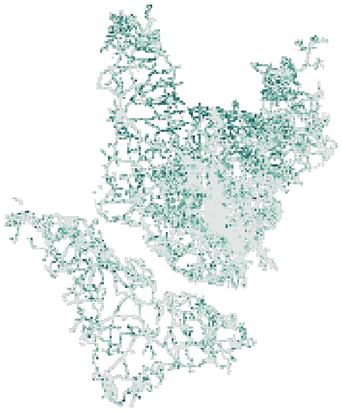

01 Old houses + Trees

18.9% city mean | 6,411 / 9,587 cells

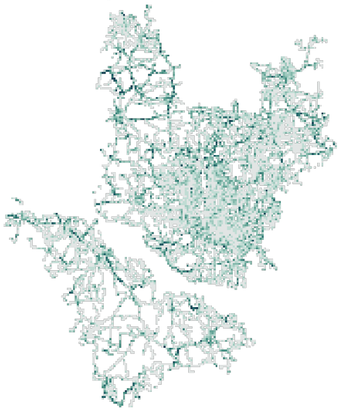

02 Grass + Trees

15.7% city mean | 5,594 / 9,587 cells

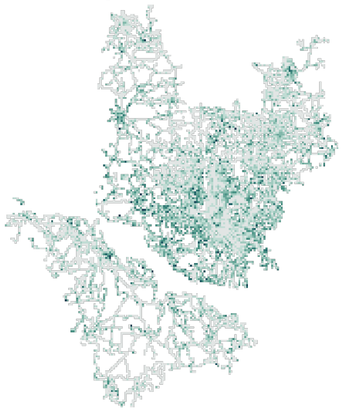

03 Trees + Overhead wires

12.4% city mean | 5,032 / 9,587 cells

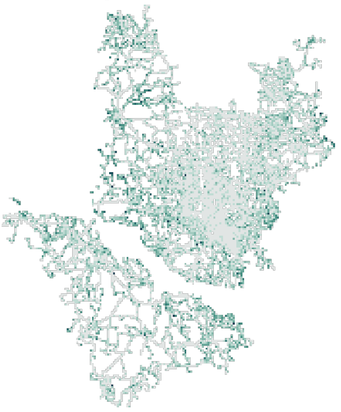

04 Walls + Trees

11.3% city mean | 4,902 / 9,587 cells

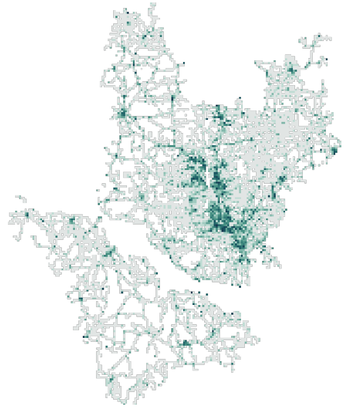

05 Fences + Trees

10.9% city mean | 5,035 / 9,587 cells

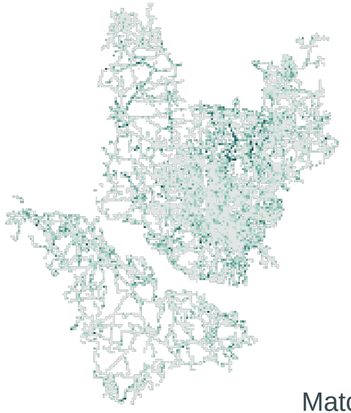

06 Billboards + Overhead wires

8.7% city mean | 3,253 / 9,587 cells

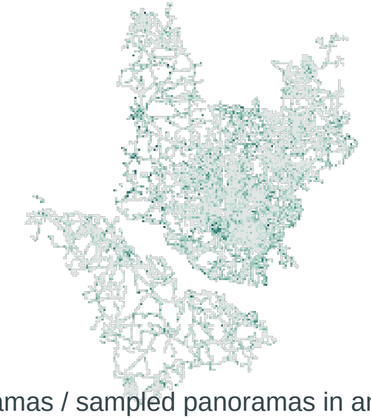

07 Trees + Utility poles

8.4% city mean | 4,212 / 9,587 cells

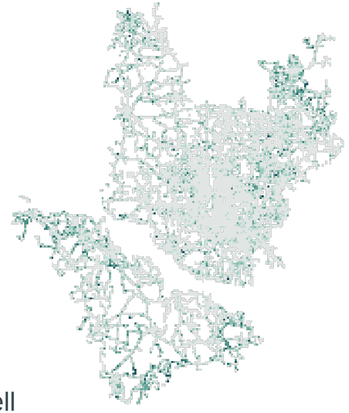

08 Billboards + Trees

8.0% city mean | 4,182 / 9,587 cells

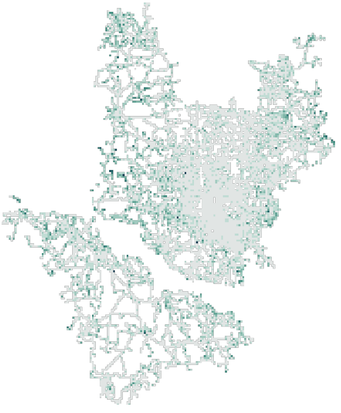

09 Trees + Water

7.2% city mean | 3,242 / 9,587 cells

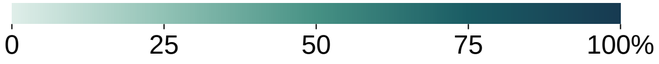

10 Fences + Old houses

7.0% city mean | 3,738 / 9,587 cells

Matching panoramas / sampled panoramas in an observed cell

Grey = observed cell with no match; white = no sampled panorama. Panels may overlap because one panorama can match multiple combinations.
SAE co-response does not verify object adjacency or road side.
